Information and Registration: [http://www.blade.org/2008tech\\_symposium/](http://www.blade.org/2008tech_symposium/)

## Is your data center ready for the future?

Find out at the Blade.org Technology Symposium 2008, where the experts will convene to discuss the top seven trends shaping the way Blades will be utilized by companies of all sizes. This invitation-only meeting will tell you what to anticipate as innovation in Blade solutions accelerates, and will spotlight solutions to keep you ahead of the game.

At the Blade.org Technology Symposium, you'll get the low down on the top trends and technologies driving the Blade ecosystem.

Leaders in the Blade community will provide a forward look at the innovation that will help you optimize data center performance today and into the future. And you'll hear from end users about the issues and pain points they rely on the Blade community to resolve.

Join senior technologists and technical executives from leading IT companies as they discuss the challenges and opportunities for the Blade ecosystem today and beyond.

**Start now to build for your future.**

You'll learn how your future will be changed by the latest breakthroughs in:

Networking

Virtualization

Security

Storage

Power and Cooling

Microprocessors and Memory

and more...

Dynamic IT
